

Contemporary

Full slab Sea Foam granite continues up the **wall**, providing a streamlined look of unbroken surfaces echoing the architectural window mass.

A simplistic custom stainless steel **hood** accommodates the professional ventilation requirements, without interrupting the linear harmony.

Warm, natural cherry **cabinets** contrast the cold steel and stone surfaces, exaggerating the earthy quality of the wood flooring on vertical surfaces.

Stainless steel **island** enhances the professional edge, providing refrigerator drawers opposite the cook wall and a water source for the multiple cook preparation center.

Illuminated, acid-etched glass **doors** give a textural depth whilst promoting the open airiness that the architectural space dictates.
